Summary of CV

This section describes briefly a summary of your career in science, academic and research; the main scientific and technological achievements and goals in your line of research in the medium -and long- term. It also includes other important aspects or peculiarities.

Initially trained as a geologist (1981), he made a bachelor thesis in Marine Geology at the University of Barcelona (1984) and did his doctoral studies at the Institute of Earth Sciences "Jaume Almera" (CSIC). He obtained a PhD in Marine Sciences from the Polytechnic University of Catalonia in 1987. He made a postdoctoral stay at Lamont Doherty Earth Observatory of Columbia University (USA). Back in Barcelona, as CSIC Senior Scientist at the Institute of Marine Sciences, he initiated pioneering research on the dynamics of particle fluxes and anthropogenic impact in marine sedimentary systems, mainly on continental margins. He has been Research Professor of the CSIC since 2008. He was vice-director of the Institute of Marine Sciences (ICM) from 2005 to 2009 and director of this Institute and the Mediterranean Center for Marine and Environmental Research (CMIMA) from July 2009 to March of 2018. His research work focuses on the study of sedimentary processes and their interactions with ecosystems with the aim of contributing to the knowledge of the relationships between sedimentary dynamics and their effects on marine environmental problems. He has published 190 scientific papers, 142 of them in international SCI journals and 18 as book chapters. He has presented 226 papers in scientific congresses and has organized several conferences and scientific meetings. His current index H by SCOPUS is 45. He is a member of the scientific committee of the magazine *Scientia Marina*, the only Spanish oceanographic journal that is in the SCI. He has participated in 39 research projects of which he has been principal investigator of six National Projects and scientific responsible of the CSIC in five projects of the EU. He has participated in 16 contracts with private companies and administrations, of which he was principal investigator of 7, preparing 22 technical reports. He has directed 9 doctoral theses. He is also the founder and head of a Quality Research Group (recognized by the Autonomous Government) with more than 10 researchers. He has participated in more than 50 oceanographic cruises in the Mediterranean, Atlantic, Pacific and Antarctic. He has been chief scientist in 22 cruises.
